

**ACTION PLAN FOR EUB DECISION 2002-041**

**COMPTON PETROLEUM CORPORATION (COMPTON)  
APPLICATIONS FOR A SOUR GAS WELL, BATTERIES AND ASSOCIATED PIPELINES  
VULCAN FIELD**

	ACTION ITEM	REQUIRED ACTION/COMMENTS	REFERENCE: D 2002-041	EUB PROCESS TO ENSURE FOLLOW-UP	STATUS & EVIDENCE
1	Flare design and off-lease odours	The Board directs Compton to ensure that the flares are designed and operated so that flare emissions from non-combusted sour gas does not result in off-lease odours. If repeat off-lease odours are traced to poor flare performance, the Board may require Compton to adopt measures to ensure adequate combustion of the sour gas.	P. 9, S. 8.3, Paragraph 2	N/A	<i>Complete.</i>  December 9 and December 12, 2003. In a written letter, Compton advised that the associated well licence and pipeline licence should be cancelled, as the geologic risk of drilling the well came to be perceived as unacceptably high.
2	H2S detection, reporting, and correction procedures	The Board directs Compton to ensure that gas and H2S detection, reporting, and correction procedures are specifically included in its operating practices and in any third-party operations contracts.	P. 9 & 10, S. 8.3 Paragraph 4	N/A	<i>Complete.</i>  December 9 and December 12, 2003. In a written letter, Compton advised that the associated well licence and pipeline licence should be cancelled, as the geologic risk of drilling the well came to be perceived as unacceptably high.
3	Summary description of operations and facility integrity (maintenance) management system	The Board directs Compton to provide a summary description of its operations and facility integrity (maintenance) management system for the proposed project prior to initiation of operations at the 4-11 and 5-1 batteries. The report must include contact information that will be provided to local residents and a description of Compton's procedures for responding to public complaints. The report must detail how any arrangements with third-party operating contractors will address Compton's operations management system and procedures for responding to public complaints.	P. 13, S. 9.3 Paragraph 3	N/A	<i>Complete.</i>  December 9 and December 12, 2003. In a written letter, Compton advised that the associated well licence and pipeline licence should be cancelled, as the geologic risk of drilling the well came to be perceived as unacceptably high.
